

Name: _____

FES 100 – Introduction to Forest Biology

Week 11 – Questions for November 16, 2007

1. Stomata open and close, but plants have no muscles or joints. How can this happen?
2. What forces are involved in generating transport of materials in phloem tissue? How does this differ from xylem transport?

Full credit is worth 5 points. Depending on the quality of your answers, you may get more, you may get less.
