

FES 100 – Introduction to Forest Biology

Week 9 – Question for October 29, 2007

On a separate sheet of paper, in the upper right corner, write your **GROUP NUMBER**, **names of all group members**, and today's date. If you did not bring notes to class, then you will need to work alone.

1. What are the similarities between viruses, Eubacteria, and Protista?
2. What are the similarities between Eubacteria and Protista?
3. What makes viruses unique?
4. What makes Eubacteria unique?
5. What makes Protista unique?

Full credit is worth 5 points. Depending on the quality of your answers, you may get more, you may get less.
